

AMENEYE VMS

INTELLIGENT SURVEILLANCE, SIMPLIFIED...

WHAT'S AMENEYE

AmenEye is an advanced Integrated Video Management System (VMS) designed to meet the growing demands of video management and security. Leveraging cutting-edge technologies, AmenEye effectively manages, analyzes, and optimizes video surveillance data, transforming it into actionable insights. Key features include Camera Configuration, Integration Support, Video Recording and Storage, Real-time Monitoring and Alerts, Live Video Feed, Object Detection and Recognition, Behavioural Analysis, Search and Retrieval, Metadata Tagging, Advanced Search Filters, Access Control and User Management, Audit Trails, Scalability and Integrations, Encryption and Authentication, Remote Accessibility, Mobile Compatibility, Compliance with Regulations, and Privacy Compliance. With Ameneye, you gain a comprehensive, secure, and scalable solution for all your video management needs.

FEATURES AND FUNCTIONALITIES

- Capture every moment with robust video recording capabilities.
- Comprehensive camera management functionalities.
- Custom alerts for instant response to critical events and anomalies.
- High availability and infinite scalability.
- Seamless integration with third-party systems.
- Live video monitoring.
- Unleash the power of video search and filtering: Find footage instantly.
- Layout customization with advanced precision.
- Access anywhere: Mobile video management!
- Video Recording & Management: Scalable storage, advanced indexing, secure backup.
- Advanced user access control and authentication.
- Proactive system health monitoring.
- Advanced playback: Effortlessly rewind, fast-forward, and scrub through footage.
- Effortlessly customize video management: Adjust cameras, integrate seamlessly, and optimize performance.
- AI-powered VMS capabilities Advanced Analytics Intelligent Alerts Predictive Maintenance Facial Recognition and more...

BENEFITS

Enhanced security and evidentiary support.

Efficient monitoring capabilities.

Enhanced user experience and robust failover mechanism.

Powerful video recording features.

Remote access anytime, anywhere.

Seamless integration with other systems.

ONVIF compliant.

Multilayer maps for enhanced visualization.

Zero downtime and more...

AMENEYE EDITION

Standard

- Great for small businesses or industries.
- Unlimited users.
- Supports up to 10 devices.
- Compatible with PCs.
- Buy once, use forever.

Standard Plus

- Great for small businesses or industries.
- Unlimited users.
- Supports up to 10 devices.
- Compatible with PCs.
- Advanced Video analytics: Object Detection and Recognition, Counting, Smoke and Fire Detection, Intrusion Detection, Face Recognition, Event Detection, and more.

Enterprise

- For large organizations with intricate needs.
- No limits on users or devices.
- Dedicated servers, data centers & organizational network installations.
- Adaptable and Scalable.
- Install anywhere within the organization without limits.

Enterprise Plus

- For large organizations with intricate needs.
- No limits on users or devices.
- Dedicated servers, data centers & organizational network installations.
- Adaptable and Scalable.
- Install anywhere within the organization without limits.
- Advanced Video analytics: Object Detection and Recognition, Counting, Smoke and Fire Detection, Intrusion Detection, Face Recognition, Event Detection, and more .

Cloud

- Cost-effective cloud solution for large organizations.
- Zero upfront costs.
- Lower maintenance expenses.
- Remote monitoring capabilities.
- Reliable user experience with strong failover.
- MIET-approved and STQC- compliant security.

Cloud Plus

- Cost-effective cloud solution for large organizations.
- Zero upfront costs.
- Lower maintenance expenses.
- Remote monitoring capabilities.
- Reliable user experience with strong failover.
- MIET-approved and STQC- compliant security.
- Advanced Video analytics: Object Detection and Recognition, Counting, Smoke and Fire Detection, Intrusion Detection, Face Recognition, Event Detection, and more..
